Re: LightSquared Subsidiary, LLC  
Ex Parte Communication. IB Docket No. 11-109  
IBSF File No. SAT-MOD-20101118-00239

Dear Marlene and the Federal Communications Commission,

LightSquared recently petitioned the FCC to affirm its license in order to allow them the ability to begin work. I am writing the FCC because I am aware of independent testing that is showing that interference with high precision GPS occurs if LightSquared goes forward with its current plan. I am a Professional Land Surveyor and the firm that I am employed with relies on the high precision GPS network for it's engineering and surveying work. The independent testing is showing that LightSquared's current plan of practice will interfere with the network that our firm and many other firms rely on. In addition to the impact on engineering and surveying firms LightSquared's current plan will also affect hundreds of thousands of people who currently use the data that Land Surveyor's produce. As a result, LightSquared should not be allowed to move forward with its current plan. I feel that LightSquared should develop a plan that would prove NOT to interfere with high precision GPS. As a result, I OPPOSE LightSquared's request of the FCC to affirm its license and its request to move forward with its plan.

Thank you for considering my thoughts and concerns.

Sincerely,

A handwritten signature in black ink, appearing to read "Penny A. Narum". The signature is fluid and cursive, with a long horizontal stroke at the end.
